Helping teams build products with purpose.

I'm Jeremy Cormier, a product designer and leader based in Halifax, Nova Scotia. For more than 15 years, I've helped teams turn early ideas and complex challenges into products people enjoy using. My experience spans startups, SaaS, enterprise and government, including work with the NHL, bet365, DraftKings, Covers and Government of Canada organizations.

Having held roles across brand direction, UX design, and product and operations leadership, I'm comfortable connecting the bigger picture with the details that make a product work. I bring clarity to what we're building and why, then work closely with designers and engineers to bring it to life. Data, experimentation and conversations with users guide my decisions, with a focus on making everyday experiences simpler and supporting lasting business growth.

Most recently, I co-founded zero2one to help companies move from discovery through design and development. Before that, I led Product & Operations for Dear Life's Collab platform and served as Senior Product Lead at Covers. I also enjoy finding practical ways to use AI and automation to reduce repetitive work, giving teams more time to explore ideas and solve the problems that need their attention.

I'd welcome the chance to bring that mix of strategic thinking, hands-on design and collaborative leadership to your team. I'm at my best when I can help people find a clear path forward and build something useful together.

zero2one | Product & development studio
2025 · **Present**

Co-Founder *(2 years)*

Helping companies accelerate product discovery, UX exploration, documentation, prototyping, and development workflows across web and mobile products.

- Supporting AI-assisted product and engineering processes while maintaining clarity and human-centered decision-making
- Reducing friction between product strategy, UX execution, and technical delivery
- Collaborating directly with startups and growing teams on scalable product experiences
- Leading UX/UI direction, product thinking, and systems-level design

Collab. | Live event content platform
2022 · 2025

Head of Product & Operations *(2 years)*

Led roadmap planning, experimentation, product operations, and UX strategy for Collab — a platform focused on capturing, sharing, and curating live event content.

- Leading cross-functional product lifecycle management and delivery
- Driving usability testing, experimentation, and UX strategy initiatives
- Aligning operations, OKRs, and execution processes

Covers | Sports media & betting platform
2019 · 2022

Senior Product Lead *(3 years)*

Led product roadmap planning, PRD discovery, UX execution, and cross-functional delivery for high-traffic sports media experiences.

- Owning roadmap planning and platform-level product initiatives
- Leading UX execution, design handoff, and design systems management
- Collaborating with product and engineering teams

(Prior professional experience dating back to 2012)

About me

Product-minded designer and product leader with experience across UX/UI design, product strategy, experimentation, systems thinking, and cross-functional collaboration. I enjoy simplifying complex problems, improving usability, and helping teams build thoughtful digital products that balance user needs with business outcomes.
